This patentable distinction is included in each of the independent claims, nos. 1, 10 and 11. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <Application Delivery Solution Configurator for determining server Farm memory requirements> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 6, line 1 through page 32, line 6, and Figures 1a-2.
